

Article 10-2B — R-1 (Single Family Residential) District

Sections:

10-2B-1	Purpose
10-2B-2	Permitted Uses (P)
10-2B-3	Limited Uses (L)
10-2B-4	Conditional Uses (CU)
10-2B-5	Accessory Structures
10-2B-6	Development Setbacks
10-2B-7	Lot Area, Dimensions, Coverage, & Residential Density
10-2B-8	Building Height
10-2B-9	Building Orientation
10-2B-10	Architectural Guidelines and Special Standards
10-2B-11	Design Standards

10-2B-1 Purpose

The R-1 (Single Family Residential) District is intended to promote the livability, stability, and improvement of the City's single family neighborhoods. This article provides standards for the orderly expansion and improvement of single family neighborhoods based on the following principles:

- A. Make efficient use of land and public services, and implement the Comprehensive Plan, by providing minimum and maximum density standards for housing.
- B. Accommodate a range of housing needs, including owner-occupied and non owner-occupied housing.
- C. Provide for compatible building and site design at an appropriate neighborhood scale.
- D. Reduce reliance on the automobile for neighborhood travel and provide a variety of options for alternative transportation.
- E. Provide direct and convenient access to schools, parks, and neighborhood services.

10-2B-2 Permitted Uses (P)

A. Permitted Uses. The land uses listed in the Zoning Matrix (Section 10-2A-4) under the R-1 (Single Family Residential) District with the letter "P" are permitted in the R-1 zone, without special action by the Hearing Body, subject to development standards of the R-1 (Single Family Residential) District, and other applicable portions of this Code. Only land uses which are specifically listed in the Zoning Matrix (Section 10-2A-4), and land uses which are approved as "similar" to those in the Zoning Matrix (Section 10-2A-4), may be permitted.

B. Determination of Similar Land Use. Similar use determinations shall be made in conformance with the procedures in Article 10-4G - Administrative Interpretations.

10-2B-3 Limited Uses (L)

A. Limited Uses. The land uses listed in the Zoning Matrix (Section 10-2A-4) under the R-1 (Single Family Residential) District with the letter "L" are allowed in the R-1 zone if they comply

with the development standards of the R-1 (Single Family Residential) District, and other applicable portions of this Code, including meeting the requirements for the necessary permits or approvals. These uses include accessory uses, temporary uses, home occupations, special uses, etc. Only land uses which are specifically listed in the Zoning Matrix (Section 10-2A-4), and land uses which are approved as "similar" to those in the Zoning Matrix (Section 10-2A-4), may be permitted as Limited Uses. The following standards are intended to control development scale; avoid or minimize impacts associated with traffic, parking, and design compatibility; and ensure management and maintenance of common areas, as applicable.

B. Determination of Similar Land Use. Similar use determinations shall be made in conformance with the procedures in Article 10-4G - Administrative Interpretations.

C. Requirements for Specific R-1 Limited Uses.

1. Home Occupation

- a. Requires application for and approval of a home occupation permit as outlined in Section 10-4I-2.

2. Mobile sales / concessions

- a. Requires application for and approval of a Temporary Use Permit as outlined in Section 10-4I-1.
- b. Only permitted during special community events such as Liberty Lake Yard Sale Weekend.

3. Public assembly

- a. Requires application for and approval of a Public Assembly Permit from the Building Official.

4. Seasonal & special events

- a. Requires application for and approval of a Temporary Use Permit as outlined in Section 10-4I-1.

5. Temporary construction / sales office

- a. Requires application for and approval of a Temporary Use Permit as outlined in Section 10-4I-1.

6. Tower, private

- a. The applicant shall show that the impact area (that area in all directions equal to the private tower's height above grade) is completely on the subject property or that an easement(s) has been secured for all property in the tower's impact area. Such easement(s) shall be recorded with the County Auditor with a statement that only the City of Liberty Lake Planning & Community Development Department or its successor agency can remove the easement.
- b. The tower must be accessory to a residence on the same site.

7. Child day-care center (in a church or a school)

- a. Any outdoor play area shall be completely enclosed with a solid wall or fully sight obscuring fence to a minimum height of 6 feet
- b. The facility shall meet Washington State childcare licensing requirements.

8. Community center / hall / club

- a. Only permitted as part of an approved Planned Unit Development (PUD) Plat.

9. Accessory dwelling unit, attached

- a. One off-street parking space shall be required for the ADU, in addition to the off-street parking required for the principal unit.
- b. The ADU shall be a complete, separate housekeeping unit that is within or attached to the principal unit with a common wall(s) and that meets the building code requirements for floor area and room sizes.
- c. The ADU shall be clearly a subordinate part of the principal unit. In no case

- shall it be more than 35% of the principal unit's total livable floor area, above grade, nor more than 900 square feet, whichever is less.
- d. The ADU shall not have more than 2 bedrooms.
 - e. A maximum of one ADU is allowed per lot. An attached ADU shall not be allowed on lots containing a detached ADU, duplex, or multi-family dwelling.
 - f. An ADU shall not be permitted if the principal unit is less than 1,200 square feet.
 - g. The ADU shall be designed in a manner so that the appearance of the principal unit remains that of a single-family residence. The ADU and its entrance shall be located in such a manner as to be unobtrusive in appearance when viewed from the front of the lot.
 - h. The principal unit or ADU shall be owner-occupied.

10. Accessory dwelling unit, detached

- a. One off-street parking space shall be required for the ADU, in addition to the off-street parking required for the principal unit.
- b. The ADU shall be a complete, separate housekeeping unit, that meets the building code requirements for floor area and room sizes.
- c. The ADU shall not be more than 35% of the principal unit's total livable floor area, above grade, nor more than 900 square feet, whichever is less.
- d. The ADU shall not have more than 2 bedrooms.
- e. A maximum of one ADU is allowed per lot. A detached ADU shall not be allowed on lots containing an attached ADU, duplex, or multi-family dwelling unit.
- f. The ADU shall have a pitched roof with a minimum slope of 4 and 12.
- g. When measured from ground level, the ridge of the ADU's pitched roof shall not exceed 24 feet or the height of the principal unit, whichever is less.
- h. Detached ADU's shall not be allowed on lots that are less than 8,000 square feet in size.
- i. The ADU shall be designed in a manner so that the appearance of the lot remains that of a single-family residential lot. The detached ADU shall be unobtrusive in appearance when viewed from the front of the lot. A minimum 6 foot sight-obscuring fence shall be required to buffer a detached ADU from adjacent lots, unless waived in acknowledged writing by abutting property owners.
- j. The principal unit or ADU shall be owner-occupied.
- k. Home occupations will be allowed within the detached accessory dwelling unit.

11. Dwelling, single family attached townhomes

- a. Within the R-1 Residential District, the maximum number and width of consecutively attached townhomes (i.e., with attached walls at property line) shall not exceed 4 units, or 160 feet (from end-wall to end-wall), whichever is less.
- b. As necessary, the City shall require dedication of right-of-way or easements and construction of pathways between townhome lots (e.g., between building breaks) to implement the standards in Article 10-3B - Access and Circulation.
- c. When garages face the street, they shall be recessed behind the front elevation (i.e., living area or covered front porch) by a minimum of 4 feet.
- d. The maximum allowable driveway width facing the street is 24 feet per dwelling unit. The maximum combined garage width per unit is 50 percent of the total building width. For example, a 24-foot wide unit may have one 12-foot wide recessed garage facing the street.
- e. Two adjacent garages shall share one driveway when individual driveways would otherwise be separated by less than 20 feet (i.e., the width of one on-street parking space). When a driveway serves more than one lot, the developer shall record an access and maintenance easement/agreement to

- benefit each lot, prior to building permit issuance.
- f. "Common areas" (e.g., landscaping in private tracts, shared driveways, private alleys, and similar uses) shall be maintained by a homeowners association or other legal entity. A homeowners association may also be responsible for exterior building maintenance. A copy of any applicable covenants, restrictions and conditions shall be recorded and provided to the city prior to building permit approval, to check for common area maintenance provisions.

12. Manufactured homes on individual lots

- a. The manufactured home shall be multi-sectional floor plan and have an enclosed floor area of not less than 1,000 sq. ft.
- b. The manufactured home shall have a pitched roof with a slope not less than 3 feet in height for each 12 feet in width (14 degrees).
- c. The manufactured home shall have exterior siding and roofing which in color, material and appearance are similar to the exterior siding and roof material used on nearby residences.
- d. The manufactured home shall have a garage or carport constructed of like materials when nearby residences have carports or garages. The City may require an attached or detached garage where that would be consistent with the predominant construction of immediately surrounding residences.
- e. The manufactured home shall be certified by the manufacturer to meet the thermal envelope requirements equivalent to those for a single-family dwelling. Evidence demonstrating that the manufactured home meets "Super Good Cents" or equivalent energy efficiency standards is deemed to satisfy the exterior thermal envelope certification requirement. Additional manufacturers' certification shall not be required.
- f. The manufactured home shall be placed on an excavated and back-filled foundation and enclosed at the perimeter such that the manufactured home is located not more than 8 inches above grade.

10-2B-4 Conditional Uses (CU)

A. Conditional Uses. The land uses listed in the Zoning Matrix (Section 10-2A-4) under the R-1 (Single Family Residential) District with the letters "CU" are permitted to locate in the R-1 zone only after a public hearing and the decision to grant a permit (conditional use permit) imposing such performance standards as will make the use compatible with other permitted uses in the same vicinity and zone and ensure against excessive interference with other permitted uses or imposing excessive demands upon public utilities and facilities as determined by the Hearing Body. Conditional use permits require a public hearing before the Hearing Examiner. Only land uses which are specifically listed in the Zoning Matrix (Section 10-2A-4), and land uses which are approved as "similar" to those in the Zoning Matrix (Section 10-2A-4), may be permitted as conditional uses.

B. Determination of Similar Land Use. Similar use determinations shall be made in conformance with the procedures in Article 10-4G - Administrative Interpretations.

C. Requirements for Specific R-1 Conditional Uses.

1. Child Day Care Center

- a. Any outdoor play area shall be completely enclosed to a minimum height of 6 feet with a solid wall or fully sight obscuring fence.
- b. The facility shall meet Washington State childcare licensing requirements.
- c. The use shall be subject to restrictions and conditions as may be imposed by the Hearing Examiner under Article 10-4H.

2. Bed and breakfast inn

- a. The facility must maintain the outward appearance of a residence and conform to the residential character of the area.
- b. Parking shall be located as to not detract from the aesthetics of the residence, street, or neighborhood.
- c. The use shall be subject to restrictions and conditions as may be imposed by the Hearing Examiner under Article 10-4H.

3. Community residential facility (6 or fewer residents) – EPF

- a. The facility shall be limited to 6 or fewer residents, including live-in caregivers.
- b. The facility must maintain the outward appearance of a residence and conform to the residential character of the area.
- c. The community residential facility shall meet any applicable state, federal, and local licensing requirements.
- d. Before issuance of a conditional use permit, the applicant shall have complied with all applicable requirements for the siting of an essential public facility in accordance with state, regional, and local mandates.
- e. The use shall be subject to restrictions and conditions as may be imposed by the Hearing Examiner under Article 10-4H.

4. Crisis residential center (6 or fewer residents) – EPF:

- a. The facility shall be limited to 6 or fewer residents, including live-in caregivers.
- b. The facility must maintain the outward appearance of a residence and conform to the residential character of the area.
- c. The crisis residential center shall meet any applicable state, federal, and local licensing for a facility housing children under the age of 18.
- d. Before issuance of a conditional use permit, the applicant shall have complied with all applicable requirements for the siting of an essential public facility in accordance with state, regional, and local mandates.
- e. The use shall be subject to restrictions and conditions as may be imposed by the Hearing Examiner under Article 10-4H.

5. Public utility local distribution facility

- a. The utility company shall secure the necessary property or right of way to assure for the proper construction, maintenance, and general safety of properties abutting the public utility local distribution facility.
- b. The use shall be subject to restrictions and conditions as may be imposed by the Hearing Examiner under Article 10-4H.

10-2B-5 Accessory Structures

Accessory structures are of a nature customarily incidental and subordinate to the principal use or structure on the same lot. Typical accessory structures in residential zones include detached garages, sheds, workshops, green houses, and similar structures. (For standards applicable to Accessory Dwellings, please refer to Section 10-2B-3). Accessory structures shall comply with all of the following standards and Sections 10-2B-6 for setbacks and 10-2B-7 for maximum lot coverage:

A. Primary use required. An accessory structure shall only be allowed on lots with another permitted, limited, or conditional use as defined above, on the same lot.

B. Compliance with land division standards. The owner may be required to remove an accessory structure as a condition of land division approval when removal of the structure is necessary to comply with setback standards.

C. Building Height. The height of a detached accessory structure shall not exceed the height of the primary structure.

D. Buffering. A minimum 6 foot sight-obscuring fence shall be required to screen the accessory structure from dwellings on adjacent lots, unless a similar screen is already provided, the distance to adjacent dwelling(s) is greater than 50 feet, or the buffer requirement is waived in acknowledged writing by abutting property owners.

10-2B-6 Development Setbacks

Building setbacks provide space for private yards, and building separation for fire protection/security, building maintenance, sunlight, and air circulation. This section is also intended to promote human-scale design and traffic calming by downplaying the visual presence of garages along the street and encouraging the use of extra-wide sidewalks and pocket parks in front of markets and other non-residential uses. The standards encourage placement of residences close to the street for public safety and neighborhood security.

Building setbacks are measured from perimeter of the structure to the respective property line. Setbacks for decks and porches are measured from the edge of the deck or porch to the property line. The setback standards, as listed and illustrated below, apply to primary structures as well as accessory structures, unless otherwise specified above for Limited or Conditional Uses. A Variance is required in accordance with Article 10-5B to modify any setback standard. If an existing border easement is in place, the setback is measured from the back of the border easement.

A. Front Yard Setbacks

1. A minimum setback of 16 feet is required, except that an unenclosed porch may be within 10 feet, as long as it does not encroach into a public utility easement.
2. Garages and carports shall be accessed from alleys or otherwise recessed behind the front building elevation by a minimum of 4 feet. Alternatively, garage and carport entrances may be built flush with the front building elevation when the building is set back by at least 20 feet.

3. Multi-family housing and other buildings that require Site Design Review (see Section 10-4C-2), shall also comply with the building orientation standards in Section 10-2B-9.

B. Rear Yard Setbacks

1. The minimum rear yard setback shall be 15 feet for street-access lots, and 6 feet for alley-access lots (except for accessory structures).
2. Accessory structures:
 - a. Structures 120 square feet or under may be located on the rear and side property lines, so long as no eave overhangs the property line, the structure is not built on a permanent foundation, and the abutting property is protected from runoff or other intrusion.
 - b. The minimum rear yard setback shall be 5 feet for all other accessory structures less than 15 feet tall and for accessory structures greater than 15 feet tall, an additional foot of rear yard setback shall be added per foot of height to a maximum of 15 feet.

C. Side Yard Setbacks

The minimum side yard setback shall be 5 feet on interior side yards and 15 feet on flanking street yards (street corner yards).

D. Setback Exceptions

The following architectural features are allowed to encroach into the setback yards: Eaves, chimneys, bay windows, overhangs, and similar architectural features may encroach into setbacks by no more than 2 feet. Porches, decks, and similar structures not exceeding 24 inches in height may encroach into setbacks by no more than 5 feet, subject to the front yard setback provisions in "A". Walls and fences may be placed on property lines, subject to the standards in Section 10-3C-5 - Landscaping and Fences and Walls. Walls and fences within front yards shall additionally comply with the vision clearance standards in Section 10-3B-2, subsection N.

E. Special Yards - Distance Between Buildings on the Same Lot

To provide usable yard area and allow air circulation and light, the minimum distance between buildings on the same lot shall be at least one-half ($\frac{1}{2}$) the sum of the height of both buildings; provided, however, that in no case shall the distance be less than 12 feet. This requirement shall also apply to portions of the same buildings separated from each other by a court, landscaped yard, or other open space.

10-2B-7 Lot Area, Dimensions, Coverage, & Residential Density

A. Residential Density Standard. The density standards in the following chart shall apply to all new development. The standards are intended to ensure efficient use of buildable lands and provide for a range of needed housing, in conformance with the Comprehensive Plan.

1. The density standards may be averaged over more than one development phase (i.e., as in a planned unit development).
2. The following types of housing categorized under other uses, are exempt from the density standards: Specialty housing (independent senior, assisted living, nursing home, convalescent home, Alzheimer's facilities), social service facilities, and bed and breakfast inns. Additionally, Accessory Dwelling Units (ADU's) are exempt due to their small size and low occupancy level.

C. Restrictions. Structures shall not be placed over an easement that prohibits such placement or encroach into the public right-of-way.

R-1 Land Use	Lot Area	Lot Width / Depth	Lot Coverage	Residential Density
Detached Single Family Housing; Manufactured Homes on Lots	Minimum area: 5000 square feet	Minimum Width: 50 feet at front property line Maximum Depth: Three (3) times the lot width, except as required to protect critical areas, etc.	Maximum: 40 percent	Minimum Net Density: 4 dwelling units per acre Maximum Net Density: 6 dwelling units per acre
Attached (townhome) Single Family Housing	Minimum area: 3000 square feet Maximum area: 7500 square feet	Minimum Width: 25 feet at front property line Maximum Depth: None	Maximum: 60 percent	Minimum Net Density: 4 dwelling units per acre Maximum Net Density: 6 dwelling units per acre
Other Uses	Minimum area: None Maximum area: 4 acres (excluding parks and recreation uses)	Minimum Width: 60 feet at front property line Maximum Depth: None	Maximum: 70 percent	None

A. Building Height Standard. Buildings within the R-1 Zone shall be no more than 35 feet tall. Building height may be restricted to less than this maximum when necessary to comply with the Building Height Transition standard in "C" below.

B. Method of Measurement. "Building height" is measured as the vertical distance above a reference datum measured to the highest point of the roof. The reference datum shall be selected by either of the following, whichever yields a greater height of building (see above examples):

1. The elevation of the highest adjoining sidewalk or ground surface within a five-foot horizontal distance of an exterior wall of the building when such sidewalk or ground surface is not more than 10 feet above the lowest grade;
2. An elevation 10 feet higher than the lowest grade when the sidewalk or ground surface described in subsection '1' above is more than 10 feet above the lowest grade. The height of a stepped or terraced building is the maximum height of any segment of the building.

Not included in the maximum height are: chimneys, roof equipment, flag poles, and similar features which are not for human occupancy, but may be restricted in height to protect views. Within residential zones, bell towers, steeples, and similar features are included within the maximum height and shall conform to the height requirements of the R-1 zone.

C. Building Height Transition. To provide compatible building scale and privacy between developments, taller buildings shall "step-down" to create a building height transition to adjacent single-story building(s).

1. This standard applies to new and vertically expanded buildings within 12 feet (as measured horizontally) of an existing single-story building with a height of 20 feet or less, as shown above.
2. The building height transition standard is met when the height of the taller building ("x") does not exceed one (1) foot of height for every one (1) foot of side yard separating the two buildings ("y"), as shown above up to a maximum 10' required side yard setback adjacent to the single story building.

Residential Single Family Attached Townhome or Multi-Family Orientation Example

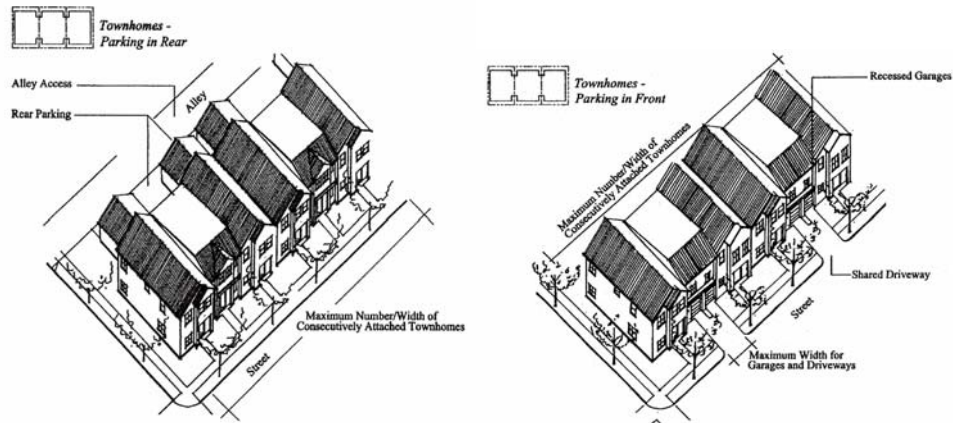

A. **Purpose.** The following standards are intended to orient buildings close to streets to promote human-scale development, slow traffic down, and encourage walking in neighborhoods. Placing residences and other buildings close to the street also encourages security and safety by having more “eyes-on-the-street”.

B. **Applicability.** This section applies to all buildings in the R-1 Zone that require Site Design Review (see Section 10-4C-2), except that the standard shall not apply to buildings which do not receive the public (e.g., buildings used solely for storage or for housing mechanical equipment; and similar uses). Limited and Conditional Uses within the R-1 zone are also required to comply with the standards outlined above in Section 10-2B-3 or 10-2B-4. Buildings that do not require site design review are encouraged to incorporate these standards.

C. **Building orientation standards.** All buildings which are subject to this Section shall be oriented to a street. The building orientation standard is met when all of the following criteria are met:

1. Compliance with the setback standards in Section 10-2B-6.
2. All buildings shall have their primary entrance(s) oriented to the street. Commercial building entrances may include entrances to individual units, lobby entrances, or breezeway/courtyard entrances (i.e., to a cluster of units or commercial spaces). Alternatively, a building may have its entrance oriented to a side yard when a direct pedestrian walkway is provided between the building entrance and the street in accordance with the standards in Article 10-3B - Access and Circulation. In this case, at least one entrance shall be provided not more than 30 feet from the closest sidewalk or street.
3. Off-street parking, drives, or other vehicle areas shall not be placed between buildings and streets, unless otherwise permitted by this Code. Refuse enclosures shall be oriented away from adjacent structures to the greatest extent practical and shall not

be placed between buildings and streets. Refuse enclosures shall be screened with a wall of not less than 6 feet in height, as outlined in Section 10-3C-3, subsection H.

Residential Single Family Attached Townhome Alley and Street Access Examples

10-2B-10 Architectural Guidelines and Special Standards

A. Purpose. The architectural guidelines are intended to provide detailed, human-scale design, while affording flexibility to use a variety of building styles.

B. Applicability. This section applies to all buildings in the R-1 Zone that require Site Design Review (see Section 10-4C-2). Limited and Conditional Uses within the R-1 zone are also required to comply with the standards outlined above in Section 10-2B-3 or 10-2B-4. Buildings that do not require site design review are encouraged to incorporate these standards.

C. Standards. All buildings which are subject to this Section shall comply with all of the following standards. The graphics provided with each standard are intended to show examples of how to comply. Other building styles and designs can be used to comply, so long as they are consistent with the text of this section. An architectural feature (i.e., as shown in the graphics) may be used to comply with more than one standard.

1. Building Form.

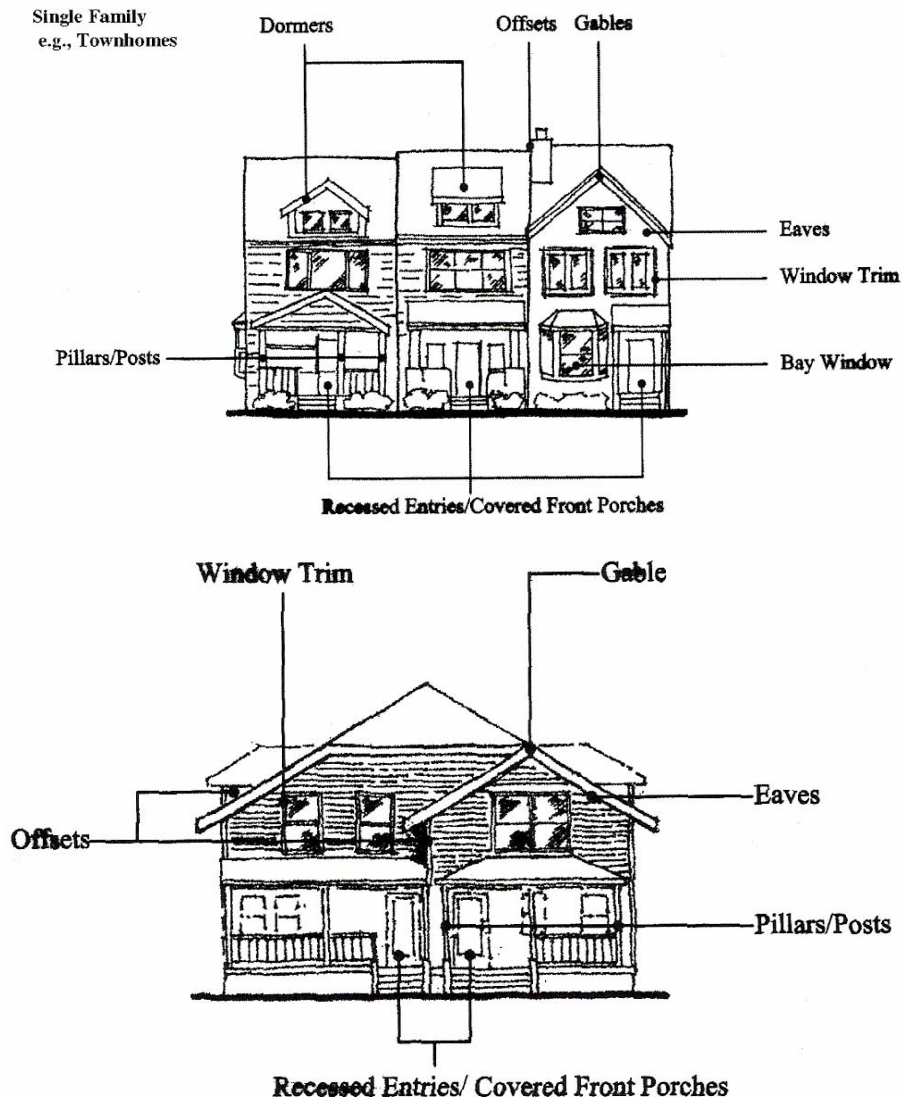

The continuous horizontal distance (i.e., as measured from end-wall to end-wall) of individual buildings shall not exceed 160 feet. All buildings shall incorporate design features such as offsets, balconies, projections, window reveals, or similar elements to preclude large expanses of uninterrupted building surfaces, as shown in the above

Figure. Along the vertical face of a structure, such features shall occur at a minimum of every 40 feet, and on each floor shall contain at least two of the following features:

- a. Recess (e.g., deck, patio, courtyard, entrance or similar feature) that has a minimum depth of 4 feet;
- b. Extension (e.g., floor area, deck, patio, entrance, or similar feature) that projects a minimum of 2 feet and runs horizontally for a minimum length of 4 feet; and/or
- c. Offsets or breaks in roof elevation of 2 feet or greater in height.

2. Eyes on the Street.

All building elevations visible from a street right of way shall provide doors, porches, balconies, and/or windows. A minimum of 50 percent of the front (i.e., street-facing) elevation width, and a minimum of 25 percent of the side and rear building elevation width, as applicable, shall meet this standard. The standard applies to each full and partial building story.

3. Detailed Design.

All buildings shall provide detailed design along all elevations (i.e., front, rear and sides). Detailed design shall be provided by using at least 2 of the following architectural features on all elevations, as appropriate for the proposed building type and style (may vary features on rear/side/front elevations):

- a. Dormers
- b. Gables

- c. Recessed entries
- d. Covered porch entries
- e. Cupolas or towers
- f. Pillars or posts
- g. Eaves (min. 6-inch projection)
- h. Off-sets in building face or roof (minimum 16 inches)
- i. Window trim (minimum 4-inches wide)
- j. Bay windows
- k. Balconies
- l. Decorative patterns on exterior finish (e.g., scales/shingles, wainscoting, ornamentation, and similar features)
- m. Decorative cornices and roof lines (e.g., for flat roofs)
- n. An alternative feature providing visual relief, similar to options a-n.

D. Materials. All proposed building materials should be durable and of good quality and appropriate to the surroundings. Exterior building materials and colors comprise a significant part of the visual impact of a building. Therefore they should be aesthetically pleasing and compatible with materials and colors of adjoining buildings and other buildings within the City. The following materials apply to new construction projects in the R-1 Zone:

1. Acceptable Roofing Materials

- a. Composition
- b. Concrete tile
- c. Slate
- d. Cedar Shake
- e. Metal - tile or shake only
- f. Copper Shake
- g. Other materials determined acceptable by the Planning & Community Development Director

2. Prohibited Roofing Materials

- a. Corrugated Metal

3. Acceptable Siding Materials

- a. Brick
- b. Stucco or Dryvit
- c. Cultured or Natural Stone
- d. Wood or Cedar Shake
- e. T-111 or Composite
- f. Vinyl Lap
- g. Other materials determined acceptable by the Planning & Community Development Director

4. Prohibited Siding Materials

- a. Corrugated Metal

5. Detailing

- a. Brick
- b. Stone
- c. Wood or Timber
- d. Board and Batten
- e. Other materials determined acceptable by the Planning & Community Development Director

10-2B-11 Design Standards

The City's development design standards are contained in both Chapter 2 and Chapter 3. It is important to review both chapters, and all relevant code sections within the chapters, to determine which standards apply.

A. Additional Design Standards. In addition to the standards outlined in this article, development within the R-1 Zone will require compliance with the following and other applicable portions of this Code:

1. Article 10-3B - Access and Circulation
2. Article 10-3C - Landscaping, Street Trees, Fences and Walls
3. Article 10-3D - Vehicle and Bicycle Parking
4. Article 10-3E - Signage Standards
5. Article 10-3F - Other Design Standards
6. Article 10-3G - Public Facilities Standards
7. Article 10-3H - Stormwater Management
8. Article 10-3I - Property Maintenance Standards
